

**pET28a-SUMO-IL8**

**Cat.No.:** V0110031

**Plasmid:** pET28a-SUMO-IL8, interleukin 8

**Specification:**

**Introductions:**

- plasmid purposes: Escherichia coli protein expression
- Expression level: High
- Cloning method: Multiple cloning site, restriction endonuclease
- vector length: 5899 bp
- Replicon: pBR322
- Promoter: T7
- 5' sequencing primers : T7: 5'-TAATACGACTCACTATAGGG-3'
- 3' sequencing primers: T7ter: 5'-TGCTAGTTATTGCTCAGCGG-3'
- vector tag: N-His, N-Thrombin, N-SUMO
- Fragment species Human
- Prokaryotic resistance: Kanamycin
- Tips: Codon optimization (for Cricetulus griseus, Escherichia coli)  
human full-length interleukin 8
- Induction method: IPTG、arabinose, lactose and their analogues
- constitutive/inducible: inducible
- Viral / non viral : non viral
